Photography/Filming

At Whitworth Community High School, we actively encourage the students to take part in as many activities as possible. We like to record these events and as such there are occasions in school when photographs are taken. They can be for regular events e.g., school production, sporting activities, concerts or the recording of work which cannot be kept by any other means e.g., PE, Drama or Food Technology. This could sometimes include video recording. Some photographs are of a celebratory nature when students have achieved a particular standard, won a competition or received an award. Others may be used in the school prospectus or when demonstrating the range of activities which take place in school. These photographic images could also be used in the local press for school publicity purposes as well as our own publications.

As the vast majority of parents/guardians support this policy, we assume therefore that you grant permission for such use of photographic images. **If however, you wish for whatever reason to withdraw this consent please contact the school in writing.**
