

John Hanson

I have been a Director of my family business, Hanson Springs Limited for over 20 years. In that time I have had numerous roles from engineering, IT to general management and finance.

As a Governor I hope to be able to bring knowledge from the private sector into school and help create closer ties between the school and local industries. As a business we have recruited a number of ex Whitworth Community High School pupils on our Apprenticeship programme. I have a vested interest in the school as my youngest daughter attends.
